MADE IN THE USA

We have always been proud to be a
Made in the USA Company, and today
this is more true than ever before.

IT'S AN INTERESTING TIME FOR OUR COUNTRY and for our world right now. With everyone hunkering down at home, in their communities, everyone is taking a hard look at where we source everything we buy.

We are thankful that we never bought into the philosophy of purchasing our materials and supplies from foreign markets with a cheap labor source. Mesabi® products are the highest quality and we need our materials and suppliers to meet our quality standards. Often, that means being able to meet face to face.

Of course, L&M Radiator, Inc. is a world-wide company—we sell our products all over the world. We have plants all over the world as well, but we are proud to be a Made in the USA Company. We have always bought local and encouraged our plants to do the same. We have always sourced materials, supplies and components from US companies. To us, it just made sense. If we order something, we can be confident of the quality and that our spec will be met. We can visit our suppliers and vendors often. If we do have an issue with a supplier, we can easily go and see

them. If there is a delivery issue, we can resolve it without a 13 hour time difference.

We have always been proud to be a Made in the USA Company, and today this is more true than ever before. 96% of our suppliers are located in the US—98% in North America. On top of that, over 50% of our suppliers are located in our home state of Minnesota.

What does this mean for our customers? It means we are open and ready for business! We have no supply chain delays and we are not scrambling to qualify new suppliers. We are in full production and ready for more orders. We are excited to continue making genuine Made in the USA high-quality products for our customers.
